

# AT-CONSORT G & L

## Liquid Consortia-Bio NPK

With BSE Technology at its core, that Stresses probiotic-based advanced production and high microbial diversity for nutrient enhancement. AT- Consort G & L contains a unique formulation of a proprietary blend of bacterial consortia, able to synthesize /assimilate /fix atmospheric nitrogen, solubilize phosphate and mobilize potash into available form thereby supplementing balance nutrition to crops.

### Dosages:

**Granule** : 4kg/acre, Broadcasting

**Liquid** : 500 ml/acre, Soil Drenching/ Drip Irrigation

### Formulation and SKU:

**Granule** : 1kg, 4 kg

**Liquid**: 500 ml, 1 ltr

### Application Window:

Vegetative stage of crops,  
preferably one week after the  
first irrigation

### Crops:

Field Crops, Vegetables, Fruits,  
Plantations, Oilseeds and Fodder
