

## AT-THRIMITE

Thrips & Mites Special

Powered by NPR Technology, AT-ThriMite is a perfect blend of premium, high-performing essential oils and botanical extracts. It provides effective control of thrips, yellow mites, red spider mites, whiteflies, jassids, and aphids.

With its dual action formula, AT-ThriMite disrupts pest lifecycles while boosting plant defense and nutrient uptake. This product is safe, residue-free, and ideal for integrated pest management (IPM), export, and organic farming.

**Formulation :** Liquid **SKU :** 250 ml & 500 ml

**Usage & Dose:**

**Dilution :** 1-2 ml per 1 litre of water

**Apply :** Every 10-15 days via foliar spray thoroughly on crop foliage

**Crops :** Suitable for all Crops

### NATURAL & EFFECTIVE PLANT PROTECTION SOLUTIONS

## AT-SPREADER+

Advanced Spreader, Sticker & Penetrator

Powered by Natural NIS Technology, AT-Spreader+ is a highly concentrated adjuvant that acts as a powerful spray performance enhancer. It works by reducing surface tension to ensure superior wetting, spreading, and adhesion of spray droplets on your crops.

This advanced formula allows for deeper penetration into leaves, prevents residue crystallization, and minimizes chemical runoff. By boosting the absorption and translocation of insecticides, fungicides, herbicides, and nutrients, AT-Spreader+ delivers faster action, better coverage, and higher yield benefits, all at a very low dose.

**Formulation :** Liquid **SKU :** 250 ml & 500 ml

**Usage & Dose:**

**Dilution :** 1-2 ml per 1 litre of water

**Apply :** Every 10-15 days via foliar spray thoroughly on crop foliage

**Crops :** Suitable for all Crops

**Note :** In case of severe infestation, Increase the dose up to 2-3 ml per 1 litre of water. (for all plant protection products)
